

Radiation Dosage Log

Date	Exam	Facility Name

Remember:

- Be sure to tell your doctor or technologist if you are, or might be, pregnant before having an imaging exam.
- Do not insist on an imaging exam if your doctor explains there is no need for it.
- Do not refuse an imaging exam if there's a clear need for it and the clinical benefit outweighs the small radiation risk.
- For more information, go to www.imagewisely.org

The physicians and staff of Radiology Associates of North Texas believe in following the ALARA (as low as reasonably achievable) principle to minimize radiation dosage at all of our covered imaging facilities. We recommend you keep a record of all imaging procedures to share with your physicians.
